### **DETAILED ACTION**

Although the memory member in an eyewear system, causes the lens rotated, have been examined and indicates allowable subject matter in the previous action, the applicant tries to diverse, (but not broader), the examined subject matter by adding new independent claims which cover separate elements in the eyewear system instead of cover the invention as a whole, for example, see newly added independent claims 74,76. This diverse subject matter introduces to another restriction requirement as follows:

#### **Restriction Requirement**

1. This application contains claims, 34-38,46-85, directed to the following patentably distinct species of the claimed invention:

A. Claims 37,38,57-76, drawn to memory member cause the lens in an eyewear system rotate;

B. Claims 36,50,77-79,85 drawn to a peripheral member together with the lens rotate in an eyewear system.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 46-49 are generic.

#### **NOTE:**

Claims 34,35 are not restricted and will be examined together with either elected species.

Art Unit: 2873

Claims 51-56,80-84 are also not restricted and will be examined together with claims from which claims 51-56,80-84 depend from, i.e., claims 51-56 will be examined together with claim 46.

Claims 80-84 will be examined together with claims 77.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
